PROFESSIONAL SUMMARY

Results-driven Senior Full Stack Developer with **3.5+** years of experience designing and deploying enterprise-grade Java/Spring Boot microservices and Angular applications in the insurance and fintech domain. Proven expertise in RESTful API design, payment gateway integrations processing 50,000+ transactions monthly, cloud-native deployment on Red Hat OpenShift (Kubernetes), and CI/CD-driven delivery with 99.9% uptime SLAs. Recognized with multiple CXO-level awards for delivery excellence and cross-functional leadership. Adept at leveraging AI-assisted development (GitHub Copilot) and unit-testing best practices to accelerate velocity and improve code quality across the full SDLC.

TECHNICAL SKILLS

Languages	Java 8/17, TypeScript, JavaScript (ES6+), HTML5, CSS3, PL/SQL
Frameworks	Spring Boot, Spring MVC, Spring Security, Spring Data JPA, Hibernate, Angular 15
Databases	Oracle, PostgreSQL, SQL query optimization
DevOps & Tools	Git, GitHub, Docker, Red Hat OpenShift, GitHub Copilot, AWS (EC2, S3), Tomcat 9, WebLogic 12c
Concepts & Practices	RESTful APIs, Microservices Architecture, API Gateway, JWT Authentication, Multithreading, OOP, Design Patterns, SOLID Principles, Agile/Scrum, SDLC.
AI-Assisted Development	GitHub Copilot
Leadership	Cross-functional Team Leadership, Stakeholder Management, Mentoring, Sprint Planning

PROFESSIONAL EXPERIENCE

Senior Software Developer

Bajaj Life Insurance | Pune, India

Jun 2023 – Present

- Leading and managing end-to-end delivery of critical projects: Payment Gateway, Mandate, Penny Drop, AutoPay Transaction and Omni Docs.
- Architected and maintained end-to-end Payment Gateway workflows processing 50,000+ transactions per month, ensuring 99.9% uptime and zero critical failures. Led performance optimization initiatives reducing average transaction processing time by 35%, enhancing system reliability and customer experience.
- Engineered mandate registration, transaction validation, and receipt generation modules with full compliance, security, and audit trail support.
- Collaborated with cross-functional teams across 6+ concurrent applications in a high-velocity production IT environment using Angular, Java 8, and Spring Boot, serving thousands of users daily.
- Built and integrated RESTful APIs for insurance policy management workflows, improving data accuracy and reducing processing errors.
- Participated in code reviews, sprint planning, and Agile ceremonies as part of a multi-disciplinary development team. Translated complex business requirements into technical solutions by collaborating directly with business analysts, product owners, and stakeholders across multiple concurrent projects
- Identified and resolved critical performance bottlenecks in backend transaction pipelines, achieving a **35% reduction in processing time** and maintaining **99.9% uptime SLA**
- Deployed and managed applications on **Red Hat OpenShift** and configured servers on **Tomcat 9 and WebLogic 12c**, contributing to CI/CD pipeline improvements and release stability, Utilized **GitHub Copilot** to improve development speed, code consistency, and reduce technical debt across the SDLC
- Served as a key contributor across cross-functional teams involving QA, DevOps, business, and compliance, bridging communication gaps and ensuring alignment on delivery goals

Intern – Software Developer

Bajaj Life Insurance | Coimbatore, India

Sep 2022 – Jun 2023

- Gained hands-on experience in enterprise Java/J2EE development, contributing to real-time insurance application modules.
- Developed foundational skills in Spring Boot, Angular, and Oracle DB within a structured corporate IT environment.

KEY PROJECTS

Payment Gateway & Mandate Management | Angular, Spring Boot, Oracle, JavaScript, Git

- Designed and implemented end-to-end payment workflows supporting mandate registration, transaction validation, and digital receipt generation — serving 50,000+ monthly transactions with high reliability.
- Optimized backend processing pipelines and integrated cloud infrastructure, cutting average response time by 35% and achieving 99.9% uptime SLA.
- Ensured PCI-compliant, secure, and auditable payment flows with full exception handling and real-time status tracking.

Associate 360 – Employee Management System | Angular, Spring Boot, PostgreSQL, Git

- Sole developer for a full-featured Employee Management System covering onboarding, offboarding, attendance regularization, salary management, asset allocation, and task monitoring.
- Delivered end-to-end from requirements to deployment; the system was adopted organization-wide to streamline HR workflows.

Penny Drop – Bank Account Verification Service | Spring Boot, PostgreSQL, REST API, Git

- Built a secure Penny Drop microservice to verify user bank accounts via micro-transaction initiation and confirmation, integrated with core banking REST APIs.
- Implemented robust error handling, retry logic, and secure DB integration to ensure 100% accurate account validation with minimal latency.

EDUCATION

Master of Computer Applications – Information Technology

Vellore Institute of Technology, Vellore

Mar 2025 – Present

Bachelor of Computer Applications | GPA : 8.20

Sri Ramakrishna Mission Vidyalaya College of Arts and Science, Coimbatore

Jun 2020 – Jun 2023

AWARDS & RECOGNITION

- **CXO Achiever Award – Recognized by leadership for outstanding individual contribution to the Payment Gateway project** Q2 FY 2023-24
- **Lead Collaboration Excellence Award – Awarded twice for leading cross-team collaboration that delivered two critical project milestones** Q3 FY 2024-25 (x2)

CERTIFICATIONS

- [Certified Java Developer – Coding Ninjas](#)
- [Java Spring Framework 6 with Spring Boot 3 – Udemy](#)
- [Certified Java Developer – Spoken Tutorial \(IIT Bombay\)](#)
